Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3,5-11 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Lindholm et al. (6,694,295).

As to claims 1, Lindholm teaches a speech recognition system in a portable device, a method for completing the user input by limiting the speech recognition selection, comprising the steps of:

Receiving a user input (qualifier) specifying at least one character in which case the speech recognition is limited to words wherein the character/characters are in question and the user speech is matched with the selected sub-model (Col.2, lines 53-67).

"According to a first aspect of the invention there is provided a method for recognizing an utterance of a user with a device, wherein a set of models of the utterances have been stored in advance and, the utterance of the user is received, the utterance of the user is compared with the pre-stored models and, on the basis of the comparison, a recognition decision is made, the method being characterized in that,

the user is allowed to provide a qualifier limiting the comparison by touching the device, the qualifier identifying an item in a menu structure of the device, a sub-set of models is selected from the stored models on the basis of the qualifier provided by the user said sub-set of models

identifying sub-items of the menu structure, and a comparison is made for making the recognition decision by comparing the utterance of the user with said sub-set of models."

As to claims 2-3 and 5, Lindholm teaches where predetermined characters specifying a word are submitted until the available sub-sets of selection are selected and where the user is notified of the results of his input (Co.Col.4, line 64-Col.5, line 20).

Claims 6-11 and 13 are analogous to claims 1-3 and 5 and are rejected by Lindholm for the foregoing reasons.
